Professional History

An Overview:

Theatre trained in the UK, narrative and storytelling sit at the very heart of my work. I've been bringing their associated skills and uses to programmes of learning since 1998.

During the 2000s, I specialised in theatre-making for training and development. As a consultant I assisted government staff, community-based and intergovernmental organisations, and INGOs. Fields of focus included counter human-trafficking, HIV prevention, immigration detention, community health, refugee resettlement, gender-based violence, and refugee's access to legal assistance. Using drama-based participatory methodologies I facilitated training on experiential learning, resource and curriculum development, psychosocial programming, and approaches to outreach and information campaigns.

From 2010 - 2016 I was a PhD research scholar (fully funded) at the National University of Singapore, writing about theatre and social change in Thailand and Burma/Myanmar. I thus remain focussed on relating the worlds of storytelling, training, and academic research to one another. Steps into the corporate world since 2016, with a focus on communication and leadership, have brought additional qualities to my work.

I currently live between Thailand and Canberra, Australia, holding clientele across Asia-Pacific and in Europe, in the business and humanitarian sectors. I am Founder and Director of Australian venture Naractiv Pty Ltd, and also a Managing Partner of Singapore based training company Lister-Stephens Pte Ltd, and our allied brand Actin.
